

Education

TBC Academy – Frontend Development

Completed an intensive program focused on modern frontend development, gaining practical experience with React, TypeScript, Jotai, TanStack, REST API integration, Tailwind CSS, ShadCN, Ant Design, and working with databases like Supabase and MongoDB. The program also emphasized agile methodologies (Scrum, Kanban), project tracking with Jira, and development best practices using tools such as Git, Postman, Prettier, and Husky.

Udemy

Angular: The Complete Guide (Maximilian Schwarzmüller)

Focused on frontend development with Angular, including component communication, reactive and template-driven forms, routing, HTTP interceptors, RxJS, form validation, and lazy loading.

The Complete Full-Stack Web Development Bootcamp (Dr. Angela Yu)

Studied full-stack development with React, modern JavaScript (ES6+), Node.js, Express.js, and EJS, along with PostgreSQL (CRUD, joins, relationships). Gained additional experience in building RESTful APIs, using Git/GitHub, and exploring the basics of decentralized applications (DApps).

Experience

Frontend Developer – Artoa

2024 – 2025 | artoa.io

Worked on building scalable, production-level web applications using Next.js, React, and TypeScript. Worked on building reusable UI components, optimizing performance, and collaborating with designers and backend engineers to deliver user-centric features.

Frontend Developer – MIKA Translations

Nov 2022 – Nov 2024

Built and maintained translation management software with Angular.js and Tailwind CSS. Created responsive interfaces, streamlined workflows, and collaborated with cross-functional teams to ensure maximum usability and productivity.
